Environmentally Relevant Information about Stamping Foils

Stamping foils represent no hazardous materials due to the Ordinance on Hazardous Substances (11/2010). According to REACH they have to be classified as articles (1907/2006/EG) and therefore are no subject to registration.

No poisonous or carcinogenic substances are used for the stamping foil production at Burger intentionally. In addition, Burger does not use any raw materials containing chlorinated hydrocarbons, cadmium, lead, mercury or hexavalent chromium.

The vast majority of our stamping foils fulfill the requirements of the various national and international regulations, taking into consideration their formulations, the specifications provided by raw material suppliers and their usage in their respective specialized applications.

Some examples are:

- Restriction of Hazardous Substances Directive - RoHS (2011/65/EU)
- Restriction on bromine compounds (2003/11/EC)
- 2006/122/EC no perfluorooctane sulfonates
- No CMR substances (materials that are carcinogenic, mutagenic or toxic for reproduction and that are classified as T or T+ according to EU Directives 67/548/EEC or 2001/59/EC or belong to the hazard class Acute Toxicity (Category 1-3) according to the CLP Regulation (EC) No. 1272/2008, including amendment 790/2009)
- None of the approval-requiring substances listed in Annex XIV of REACH in its version 04/2013
- No substances depleting the ozone layer. Our Stamping foils fulfill the requirements of the Regulation (EC) No. 1005/2009 and are no products as described in Article 17 (export) of this Regulation
- EuPIA´s (European Printing Ink Association) raw materials exclusion list
- In the automotive area, the requirements of the End-of-Life Vehicles Directive of 2002 (2000/53/EC), which requires the individual components to be stored in the IMDS system to ensure traceability during vehicle disposal

if customers use our stamping foils in the proper manner to finish products, these foils are in conformity with REACH and no further activities regarding REACH regulation are necessary.
